Staff Comments

I hope we are done with quarantine of close contact when we are wearing masks unless students show symptoms.

We have kids getting sick and kids on quarantine testing positive once they have been indentified as close contacts. That alone should keep the quarantine and masks until we know more. If we want to keep the quarantine and get rid of the masks at the HS I am fine with that, it would be an incentive to get the shot.

should have an option to select which school you work at

To mask or not should be a parental choice, not mandated by others.

I don't think mask wearing should be optional - it should be mandatory as should wearing the masks above the nose (otherwise they do no good), so there is really no choice for me and I believe close contacts should remain at home. So, my rating of those two things is different from what I had to mark.

Vaccinations and testing should be components within policy. What is the status of the grant to get testing in the schools?

People who are unvaccinated should wear masks. Vaccinated persons shouldn't have to wear a mask.

NA

First would be student Participation in academic instruction

Staff Survey Results

Here are the results from the HMS Survey:

3 classified replied
16 certified replied
19 total surveys

Most Important:

5% - participation in athletics
26% - close contacts remain at home
37% - students in school - masks optional
16% - students in school - masks required
26% - Modified Format

2nd most important:

26% - participation in athletics
16% - close contacts remain at home
26% - students in school - masks optional
21% - students in school - masks required
11% - Modified Format

3rd most important:

32% - participation in athletics
0% - close contacts remain at home
11% - students in school - masks optional
37% - students in school - masks required
21% - Modified Format

4th most important:

11% - participation in athletics
37% - close contacts remain at home
21% - students in school - masks optional
5% - students in school - masks required
26% - Modified Format

5th - Least Important:

26% - participation in athletics
32% - close contacts remain at home
5% - students in school - masks optional
21% - students in school - masks required
16% - Modified Format

Comments:

I appreciate the impact that these decisions make, good luck in your fight to keep students safe.

It's important to keep healthy kids at school, not at home.

Over 650,000 Americans have died from Covid-19

I do not feel kids should be sent home when they are not having symptoms.

Keep kids in school. Quarantines don't work.

#1 - Salary: If we can pay someone 10K for doing nothing and minimal contact with students, then we have very different expectations for those that do. #2 - Follow the directions of the CDC, and state/local Health Dept.

To me, the most important thing is to ensure that students are in school, regardless of how that happens. Although I'd prefer not to wear a mask, if masks are needed to keep kids in schools, then let's stick with that.

I don't believe the level of importance is the same at all ages. If those who are able to get vaccinated and are, that changes things. Obviously, it's most important to keep kids in classrooms and activities for their mental and physical well-being. That looks different from the elementary school to the high school.

Staff should not be talked about by admin regarding vaccination. The covid vaccine is currently optional and judging to a staff member's face or to someone else is inappropriate and unprofessional. While staff should remain professional and support decisions made by the board, they should not be expected to share all the same opinions.

I would be fine if there was a way to monitor the kids in close contact at school for symptoms instead of having to quarantine at home if they are healthy BUT I feel like masks still need to be required for everyone because the spread would likely happen before any symptoms occurred. It would also be impossible as a staff member to know which kids were "required" to wear a mask due to close contact if it was optional otherwise.

I would love to be asked more about what is most important from a teachers point of view. Let's talk about having kids in the room, the kids emotional well being, the student growth, etc.... I know masks is the big debate but what's most important to me is kids at school to be able learn and grow academically, socially, and emotionally.

This is really confusing. I don't understand why we rank the items, instead of answering yes or no questions. For example, "close contacts remain at home would rank the same (least important) as a few of the other items. It doesn't feel like a survey to me, it is very confusing. I don't know how this can accurately show how we feel as staff or parents.

I think a "yes, no, or maybe" kind of survey would work a lot better.

To be clear on my own feelings since the survey won't give you a feel for those,, I think masks should be a personal choice and our schools should adopt the "test to stay" policy. Quarantines should end for healthy kids as well. An antibody test could also tell us a lot about where

our kids are in this virus. Maybe most have had it? That would make wearing a mask pointless. I'd love to see more smiles and show my smile too! This survey also leaves out mental health which is a HUGE mistake.

I assume identified close contacts could be student or teacher.
Asking someone to take a sick day when they are not sick is unjust.

If there are CDC guidelines out, why are we not just following those?

I am not sure what a modified format would look like or require, but I am open to other ideas as long as we are following the CDC guidelines. I did NOT respond or answer the parent survey as I did not feel it was appropriate for me to do so. I will answer this one as my employer has asked me to do so. Bottom line is we must follow CDC guidelines.

Vaccination status of adults. Test to learn--antigen test neg close contact can stay at school
